

Downtown Construction Activities

Proposed work activities for the week of June 27th, 2021

- The contractor at the Generals Bridge project will begin paving the section of roadway within the new bridge and along the east northbound lane at Thomas Burgin Parkway adjacent to the new bridge. In addition, the contractor will continue finishing the surfaces of the concrete barrier walls.
- At the McConville Way project the contractor will continue construction of the streetscape aside the new roadway. The streetscape work includes the continued installation of brick pavers, bike racks, trash receptacles, catenary lights (alleyway), and roadway signage. At the future pocket parks, the contractor will continue sealing paver joints and sweeping in polymetric sand between brick pavers. In addition, the contractor will be placing the pavement markings along Parkingway, Granite St, Cliveden St, the Messina Lot, Walter J Hannon Parkway, and McConville Way. During the time of the pavement marking installation there will be temporary detours of these roadways.
- At the old 100 Parking Way site the contractor will install new pavement markings and the new payment kiosk. The new parking lot remains closed during construction and there remains no parking along McConville Way and Parkingway.

(The photo on the above left shows the contractor installing new pavement along McConville Way. The above right photo shows the contractor placing pavement at intersection of Parkingway and Walter Hannon Parkway.)
